

The *Lotus Live* Guide to **Biology**

(Updated January 2, 2008)

Table of Contents

Introduction	2
Origin, Creation and Classification of Species	2
<i>Origin of Species</i>	2
<i>Genetics</i>	2
<i>Taxonomy: Classification</i>	2
<i>Adaptation</i>	2
Cells	3
<i>Cell Structure</i>	3
Human Biology	3
<i>Disease</i>	3
<i>Psychology</i>	3

Introduction

- Because we believe every person, regardless of formal education level should be able to learn about and contribute to the solutions that will make a better world, this guide is your source for education about all of the intermediate and advanced biology you will need to fully understand the content on Lotus Live.
- As Lotus Live's knowledge base increases, and as new resources are created, this guide will be updated. The most recent version of this guide can be found [here](#).
- Eventually, Lotus Live will be collecting educational materials specifically tailored to what the average person needs to know to fully understand the problems and solutions in the future. For now, check out the following excellent ecology guides from Visionlearning.

Origin, Creation and Classification of Species

Origin of Species

- For now check out the Visionlearning modules on [The Origin of Species I](#), [The Origin of Species II](#), and [Origin of Species III](#).

Genetics

- For now check out the Visionlearning modules on [Genetics I](#), [Genetics II](#), and [DNA and RNA](#).

Taxonomy: Classification

- For now check out the Visionlearning modules on [Taxonomy I](#) and [Taxonomy II](#).

Adaptation

- For now check out the Visionlearning module on [Adaptation](#).

Cells

Cell Structure

- For now check out the Visionlearning module on [Cells](#).

Human Biology

Disease

- For more in depth information about disease, check out the [Lotus Live Guide to Disease](#).

Psychology

- For more in depth information about psychology, check out the [Lotus Live Guide to Psychology](#).

About this Guide

Author: [Nick Enge](#)
